

REFERENCESAFRICA

This is a listing of published material that I have used as references for my checklist. It is arranged to be a supplement for the checklist, rather than a conventional bibliography. The top line (underlined) above each entry is the reference code as it appears in the checklist on the "Ref:" line for each token description. Entries are arranged alphabetically by the reference code, not necessarily by the author or title. As in the checklist, an asterisk (\*) after the item number indicates that I have a copy in my personal library. These copies are not always in the original, especially with the foreign works and out of print journals, ... but I have them. This is *not* a complete list of reference works on African tokens that I know to exist. There are a number of token references, known to me from the bibliographies of other authors, that I have been unable to view, even in a library copy. Since I have not cited them in the token checklist, they are not included here.

The coverage of numismatic material in the works below is very uneven. A few of the classic African tokens are described in half-a-dozen or more of the books and journals listed below. Many recent tokens have never been described in print anywhere, at all. The European colonial empires are fairly well covered, but the independent countries are scarcely mentioned. There is a lot of work needing to be done in this area of numismatic cataloging.
